Optimal temperature year round

To ensure you can enjoy your vehicle year-round, our models are insulated using **XHP** - a polyether-based polyurethane compound with unprecedented insulation properties - and a 25 mm-thick Styrofoam floor. In fact, **XHP insulation meets the NF EN 1646-1 Motorhome Standard**. It also helps eliminate thermal bridges.

Thanks to the XHP
insulation
system, when it is

-15°C

outside, the interior
can be heated to

20°C

in only

3^H32

DREAMER insulation & heating test
at -15°C, with TRUMA COMBI 4, as per
the **NF EN 1646-1 standard**.
